

Kishore Kumar Sharma

6+ Years | Senior Full Stack Engineer | Java | Spring Boot | Node.js | React | AWS | Microservices

Email: kishoresharma914@gmail.com | LinkedIn: [Kishore Kumar Sharma](#) | Mobile: +91 8638099280 | Noida, UP

SUMMARY:

Results-driven **Senior Full Stack Engineer (6+ years)** with proven expertise in building and leading cloud-native microservice architectures using **Java/Spring Boot, NodeJS/NestJS, MEAN/MERN stack and React/Angular**. Experienced across **Telecom, FinTech, GovTech, and EdTech domains** with a strong focus on scalability, performance, and automation. Skilled in **AWS Cloud, CI/CD pipelines, and system observability**. Passionate about mentoring teams and driving full lifecycle delivery of enterprise-grade software that improves efficiency and customer experience.

SKILLS:

- **Backend:** Java, Spring Boot, Spring Cloud, Spring AOP, Microservices, Node.js, Nest JS, Express.js, REST APIs, JWT, OAuth2.0, Socket.io, Maven, NPM, Performance Optimization, Circuit Breaker, Retry Patterns, Rate Limiting
- **Databases:** PostgreSQL, MySQL, MongoDB, Stored Procedures, Triggers, Redis
- **Cloud & DevOps:** AWS (S3, EC2, AWS App runner, Code Build, Code Pipeline, IAM, ECR, Lambda, Secrets Manager, RDS, Cloud Watch), Docker, Jenkins, SonarQube, Git/GitHub/GitLab, Grafana, Shell Scripting, CI/CD
- **Architecture & Practices:** Microservices Architecture, API Security, OOP, DSA Fundamentals, ETL & Data Migration, Distributed Systems, Caching Strategies
- **Frontend:** JavaScript (ES6), TypeScript, React.js, Angular (10+), React Native
- **AI and Developer Productivity:** GitHub Copilot, Gemini, Claude, Cursor, AI assisted development, Prompt Engineering, Agentic Development workflows, Antigravity
- **Software Engineering:** Clean Architecture, Agile/Scrum, Code Reviews, Technical Design
- **Soft Skills:** Technical Leadership, Mentoring, Client Communication, Problem Solving, Decision Making, Team Collaboration

WORK HISTORY:

Systems Engineer | Tata Consultancy Services Pvt Ltd

May 2023 - 10-April-2026

- ◆ Designed and delivered scalable microservices using Java 17 and Spring Boot 3 for telecom enterprise platforms.
- ◆ Built workflow automation solutions improving operational efficiency and system performance.
- ◆ Optimized backend APIs and databases achieving up to 30 percent improvement in response time and throughput.
- ◆ Led code quality, CI CD governance, and secure API practices while mentoring junior engineers.
- ◆ Developed shared core libraries and reusable modules to standardize services and improve maintainability.
- ◆ Collaborated with product, architecture, QA, and operations teams to deliver enterprise scale solutions.
- ◆ Performed code reviews, debugging, and production issue resolution to improve platform stability.
- ◆ Implemented observability with logging, monitoring, and performance metrics.
- ◆ Integrated and supported 35 plus enterprise systems ensuring reliable and secure data exchange.
- ◆ Contributed to architecture reviews, deployment planning, and release readiness.

◆ Team Leadership & Delivery:

- Led a cross-functional development team delivering high-impact microservices solutions
- Mentored junior engineers through technical guidance, pair programming, and best practices
- Distributed tasks, sprint planning, and delivery ownership
- Conducted code reviews ensuring clean architecture and performance standards
- Facilitated knowledge transfer sessions and resolved technical blockers

◆ Technologies Used:

Java 8/17, Spring Boot 3, Node JS, Angular, TypeScript, React JS, Spring Cloud, Microservices Architecture, REST APIs, MySQL, PostgreSQL, Mongo, Redis, AWS, Docker, CI/CD, Grafana, Logging, Monitoring, ELK, API Security, Distributed Systems, Performance Optimization, Agile/Scrum, Technical Leadership, Mentoring, Client Communication, Problem Solving, Decision Making, Team Collaboration, OWASP ZAP, GitHub Copilot, Gemini, Claude, Cursor, AI assisted development, Agentic Development workflows, Antigravity, SonarQube, Maven, JWT, OAuth 2.0, NPM, Rate Limiting, LLD/HLD, Git/GitHub/GitLab, Shell Scripting.

◆ Projects

- **DIA (Jan 2024 - Apr 2026) :-** Led the architectural design and development of a large-scale microservices platform supporting the DIA initiative and a Pan-India 4G network rollout, enabling seamless integration across more than 30 enterprise services. Owned the end-to-end design and implementation of critical microservices handling nationwide logistics, vendor workflows, site validation, purchase order processing, and inventory tracking. Established centralized dependency management and built shared core utility libraries to improve consistency, scalability, and long-term maintainability. Mentored junior developers while enforcing strong code quality standards and Agile best practices, and optimized backend services to significantly enhance API response times, ensuring high reliability and performance at scale.
- **Network Planning Spectrum Lease (Jun 2023 - Dec - 2023) :-** Managed and maintained a microservices-based architecture for internal network planning portals, demonstrating strong expertise in distributed systems. Delivered end-to-end full-stack solutions across both front-end and back-end layers, ensuring seamless functionality and integration. Prioritized code optimization and performance tuning to deliver high-quality, scalable solutions that consistently met client and business expectations.

Software Engineer | Credenc Web Technologies Pvt Ltd (A Capital India Group)

October 2021 - May 2023

- ◆ Modernized CRM and loan processing platforms, reducing manual effort by 70 percent.
- ◆ Integrated third party financial APIs and automated workflows, cutting loan approval time by 50 percent.
- ◆ Developed scalable backend APIs using Node.js, NestJS, PostgreSQL, and MongoDB.
- ◆ Built mobile and B2B B2C applications using React Native and Angular.
- ◆ Implemented AWS based CI CD pipelines, improving deployment efficiency by 60 percent.
- ◆ Improved system performance using caching, logging, and distributed tracing.
- ◆ Migrated legacy systems to modern architectures with zero business disruption.
- ◆ Ensured data security, compliance, and best practices for sensitive financial systems.
- ◆ Contributed across full SDLC from requirements through production release.
- ◆ Partnered with product and business teams to deliver scalable solutions.

◆ Technologies Used:

Node.js, NestJS, React JS, Express.js, REST APIs, Java, My SQL, PostgreSQL, MongoDB, Redis, TypeScript,

React Native, Angular, AWS, CI/CD Pipelines, Docker, API Integrations, System Migration, Performance Tuning, JWT, OAuth 2.0, Socket I.O, Microservices, Sonar Qube, LLD/HLD, Git/GitHub/GitLab, Payment Gateway Integration, Shell Scripting.

◆ Projects

- **FinTech CRM & Processing Systems (Web, CRM, Credit Portal, LdMS, Mobile, B2B/B2C Platforms) (Oct 2021 - May 2023) :-** Spearheaded the modernization of legacy CRM and loan processing platforms to significantly improve customer onboarding user experience. Reduced manual processing effort by over 70% through robust API integrations, including automated bank statement analysis. Implemented CI/CD pipelines on AWS to streamline deployments, achieving a 60% improvement in release speed. Enhanced overall system reliability and performance by strengthening observability through distributed tracing and optimized caching mechanisms.

Full Stack Software Developer | Skaplink Technologies Pvt Ltd

March 2020 - September 2021

- ◆ Built a real time online tutoring platform with live classrooms using Socket.io.
- ◆ Developed responsive web and mobile applications using React, Angular, and React Native.
- ◆ Integrated subscription based payment systems with secure transaction handling.
- ◆ Implemented backend APIs and real time communication services.
- ◆ Delivered government e governance portals used at scale across multiple departments.
- ◆ Built dashboards, workflows, and secure REST APIs for education and governance systems.

◆ Technologies Used

JavaScript (ES6), React.js, Angular, React Native, Node Js, Async.js, Java, Socket.io, REST APIs, MySQL, Payment Gateway Integration, Real-Time Systems, Responsive UI Design, PHP, WebRTC.

◆ Projects

- **Skaplink (Online Tutoring Platform) (Mar - 2020 - Sep 2021) :-** Led the development of a real-time online tutoring platform connecting students and educators. Implemented live classroom collaboration features using Socket.io to enable seamless real-time interactions. Integrated secure payment gateways and delivered cross-platform mobile applications, ensuring a scalable and user-friendly learning experience.
- **E- Governance Portals (Projects: PMS, GeoTagging, Biodiversity, Asset & Attendance Management) (Mar - 2020 - Sep 2021) :-** Delivered end-to-end full-stack modules for e-governance systems used across multiple government departments. Built responsive dashboards and robust REST APIs to enable seamless integration and reliable data exchange between distributed systems.

Software Developer | S.S. Technologies Pvt Ltd

August 2019 - March 2020

- ◆ Developed a college automation platform improving operational efficiency by 80 percent.
- ◆ Built backend APIs and dashboards using PHP, Angular, and MySQL.
- ◆ Developed Android applications for parental monitoring and tracking features.
- ◆ Supported end to end delivery including development, testing, and production rollout.
- ◆ Collaborated closely with cross-functional teams and stakeholders to gather requirements, translate business needs into technical solutions, and ensure timely, high-quality delivery

◆ Technologies Used

HTML, CSS, JavaScript (ES6), React.js, Angular, Node Js, PHP, Symphony, MySQL, REST APIs, System Automation, SDLC.

◆ Projects

- **College Automation Tool (Aug - 2019 - Mar - 2020) :-** Designed and implemented a comprehensive system to improve the efficiency of college admissions and fee management processes. Developed robust backend APIs using PHP and Angular, significantly enhancing usability and operational effectiveness for day-to-day college administration.
- **App Monitoring Tool for Parents (Aug - 2019 - Mar - 2020) :-** Developed a parental control application featuring geo-tracking and activity monitoring capabilities. Built scalable backend APIs and intuitive parent dashboards with a strong focus on reliable data synchronization and clear, actionable visualizations.

EDUCATION:

MCA | Manipal University Jaipur
Bsc CS | Lalit Chandra Bharali College

May 2021 - September 2023
August 2016 - June 2019

LANGUAGE:

English — Professional Working Proficiency
Hindi — Native / Bilingual Proficiency
Assamese — Native / Bilingual Proficiency
Bengali — Limited Working Proficiency

AWARDS & ACHIEVEMENTS:

Best Employee Of The Year — Credenc
Star Performer of The Month — Credenc
Star of the Month Award — TCS
Technical Excellence Award — TCS
Applause for Team Award — TCS
On-The-Spot Award — TCS

CERTIFICATIONS:

Generative AI Foundation Curriculum
Java 17 Masterclass
IBM DevOps & Software Engineering Specialization
IBM Full Stack Software Developer Specialization
Application Development using Microservices & Serverless
Containers with Docker, Kubernetes & OpenShift
Network Security & Ethical Hacking Basics
